

Ang Li | Google Resume

liang810@berkeley.edu Googler Since: 2022 Core Role: Software Engineer

Google Timeline

YouTube Abuse Detection

- Model infrastructure
 - Build Themis (holistic abuse ranking and decisions to human reviewers) Infrastructure. Build features storage/versioning, continuous release pipeline to automate model training and serving.
 - Designed and implemented feature deprecation framework on Kapla.
 - Developed Channel arbitrage classifiers to classify Channel, livestream entities. Collaborate with Supply Demand Management to optimize review efficiency optimization.
- Machine learning Model performance optimization
 - Launched feature selection framework and Themis development velocity improvement for training.
 - Ran multiple AB experiments for corpus/ingestion ranker migration, including design/launch reviews.
 - Migrated multiple ECR/VVR verticals to Themis ranking, targeting Youtube Trust and Safety top level metrics.
 - Implemented tensorflow xmanager launcher/trainer for metrics optimization(python, c++). Incorporated data pruning in preprocessing to speed up training. Launched multiple VVR/ECR/Flag heads using postprocessing and multiarm bandit.

Pre-Google Experience

Software Engineer at Disney + Hotstar (2020-2021)

- Homepage recommendation optimization
- Initiated a new user onboarding experiment(cold start) on hotstar.com.
- Rolled out ex-deepfm collaborative filtering algorithm for new popular trays, masthead and notification. Reduced position bias in recommendation algorithm. Incorporated features such as time, user behaviors and languages.
- Built Cloudwatch alarm infrastructure on AWS.
- Automated end-to-end training and data generation pipelines with online service.
- Used multiple features to improve user watch time.

Autonomous driving Intern at Xiaomi (2020)

- Build AI data platform for autonomous driving/parking algorithms.

Education

M.S. Computer Science, University of Pennsylvania, 2020

B.S. Computer Science, Mathematics, Statistics(triple), University of California, Berkeley, 2018
